

# Plant Biology Seminar Series - Spring 2004

Fridays, 11:30 AM, 138A Foran Hall, Cook Campus

<b>Date</b>	<b>Speaker &amp;</b>	<b>Topic</b>	<b>Host</b>
Jan. 16	Dr. Doris Wagner	University of Pennsylvania Meristem identity in Arabidopsis	Dr. Chen
-----seminar will be held in Waksman Institute Room 1001 due to the Turfgrass symposium-----			
Feb. 13	Dr. Douglas Helms	USDA NRCS Understanding Soil: A Critical Factor in Southern History	Dr. Heckman
Feb 20	<b>no seminar</b>		
Feb. 27	Dr. Georg Jander	Boyce Thompson, Cornell A High-Throughput Screen for Arabidopsis Seed Amino Acid Mutants	Dr. Leustek
Mar 5	Dr. Thomas Bultman	Hope College Effects of Fungal Endophytes on Pest and Beneficial Insects in Managed and Natural Ecosystems	Dr. White
Mar 12	<b>no seminar</b>		
March 19	<b>Spring Break - no seminar</b>		
March 23 <b>Tues.</b>	*1:00 Dr. William T. Cefalu,	Pennington Biomedical Research Center, Baton Rouge, Louisiana Nutritional Considerations in the Management of Insulin Resistance	Dr. Raskin
March 24 <b>Wed.</b>	*1:00 Dr. Carl-Otto Ottosen & Dr. Eva Rosenqvist,	Danish Institute of Agricultural Sciences Using Fewer Resources When Producing Plants In Protected Cultivation <i>Or – The Optimum May Not Be The Best!</i>	Dr. Both
Mar 26	Dr. Steven Tanksley	Cornell University The Molecular Basis of Quantitative Variation: Lessons from the Tomato	Dr. Maliga
Apr 2	Dr. John Bowman	University of California, Davis Establishing Polarity in Plants	Dr. Chen
Apr 9	<b>No Seminar</b> - Good Friday		
Apr 16	Dr. Neelima Sinha	University of California, Davis Compound Leaves: Division or Multiplication?	Dr. Kerstetter
Apr 23	Dr. Rod Wing	University of Arizona TBA	Dr. Messing
Apr 30	Dr. Kenneth Cameron,	Lewis B. and Dorothy Cullman Program for Molecular Systematics Studies, New York Botanical Garden Molecular Systematics of Vanilla and Related Orchids	Dr. Havkin-Frenkel
